## Backyard Buddies

Are you a city slicker or a country kid? Wherever you live, you share the great outdoors with many kinds of animals. Just like you, your wild neighbors need sun, shade, clean soil and water, plants to

eat, and places to rest. Remember that your environment is their home too!

Circle all the animals you find in this backyard scene. Can you spot all 14?

On the back, draw a city scene. In it, include some wild animals who naturally make their homes there. Hint: Many of them could be critters you circled on this page!
